EDUCATION

B.Sc. in Physics — Shandong University, Qingdao

2024 – 2028

Institute of Frontier and Interdisciplinary Science

Coursework: quantum mechanics, electrodynamics, statistical physics, particle physics, computational methods. Senior thesis on TMD factorization planned for 2027–28.

RESEARCH INTERESTS

Transverse-momentum dependent distributions and nucleon spin structure; SIDIS and Drell–Yan phenomenology; small weight-tied sequence models and the optimizers that suit them.

PUBLICATIONS & PREPRINTS

- Y. Chen, "Higher-twist corrections to polarized TMDs from Gegenbauer moments," manuscript in preparation, The European Physical Journal Plus, 2026.
- Y. Chen, "Depth-aware optimizers for weight-tied feed-forward stacks," preprint, arXiv submission planned for November 2026.

RESEARCH EXPERIENCE

Undergraduate researcher — Particle Theory Group, SDU

2025 – present

- Built a Gaussian model with width$^2 = z^2\langle k_T^2\rangle + \langle p_T^2\rangle$ to extract $\langle k_T^2\rangle$ from published SIDIS multiplicities, then cross-checked the result against JLab 12 GeV data from CLAS12 and Hall C.
- Twice-weekly reading group on spin physics; notes on twist-3 contributions and Gegenbauer moments circulated to the group.

TEACHING & GRADING

Grader and teaching assistant — Zhixin Education

2024 – present

- Graded national-semifinal physics olympiad (CPhO) scripts against a written rubric.
- Designed a rubric-driven grading pipeline with LLM assistance; it now processes a full exam batch end to end, with every score traceable to a rubric item.

SELECTED PROJECTS

- **Loop_FFN.** Shared-weight loop FFN (SwiGLU) vs. stacked FFN on Higgs, depth sweep {1, 2, 4, 8, 16}; +0.43 pp at depth 4 ($p < 0.05$). Code, logs and reproduction scripts released.
- **exam-RAG.** Hybrid retrieval over 46 physics textbooks (ChromaDB) wired into a production grading pipeline, so that every judgement cites a source page.

TECHNICAL SKILLS

LANGUAGES	Python (primary), C++, CUDA, Bash
SCIENTIFIC	PyTorch, ROOT, Geant4, Mathematica
METHODS	TMD model fitting, retrieval-augmented pipelines, ChromaDB hybrid search, LaTeX and TikZ
TOOLING	Git, HPC clusters and batch jobs, reproducible builds

LANGUAGES

Chinese (native) · English (working proficiency; IELTS in preparation, target band 7.0).
